

WOLF CYLINDER SYSTEMS

WOLF

THE EXTENSIVE EQUIPMENT RANGE

offered by system supplier WOLF provides ideal solutions for commercial and industrial buildings, new build and modernisation projects alike. The range of WOLF control units can meet any requirement for heating convenience. All equipment is easy to operate, highly energy efficient and reliable.

Solar thermal systems can be swiftly integrated into existing systems.

WOLF equipment is easy and quick to install and maintain.

NOTES		29

BSP STRATIFICATION BUFFER CYLINDERS

Stratification separators stabilise the temperature layers inside the cylinder and improve the solar yield significantly

Hydraulic components, such as the freshwater module, 2 circuits with mixer and solar pump assembly, can be mounted on the cylinder itself or on the wall

Highest possible solar yields, as the cylinder can be heated up to 95 °C without risk of scaling or scalding

Space saving steel stratification buffer cylinder with quality certificate

Hygienic DHW heating with a powerful FWS-2-60/FWS-2-80 freshwater module with high efficiency pump [EEI < 0.20]

Push-fit connections enable DHW circulation set to be retrofitted; control via time switch, thermostat or by opening the tap

Single cylinder system for the **lowest heat losses**

As option with 2 mixing circuit assemblies for high and low temperature circuits

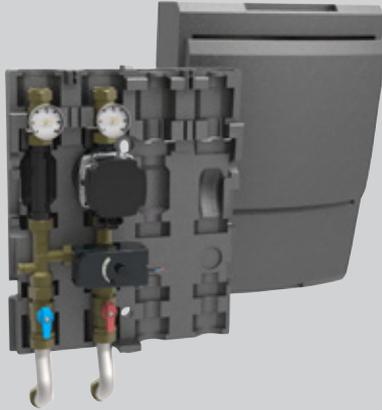

Affordable solution for central heating backup

5 year statutory warranty on the floorstanding cylinder; 2 years on electrical and moving parts

Thermal insulation removable for easier transport into the installation room

1 1 BENEFITS OF THE WOLF STRATIFICATION BUFFER CYLINDER
 BSP, BSP-B, BSP-SL BSP-W, BSP-W-B, BSP-W-SL

	Freshwater module	FWS-2-60	FWS-2-80
Solar indirect coil			
2 solar indirect coils		BSP-SL-1000	BSP-W-SL-1000
1 solar indirect coil		BSP-800/1000	BSP-W-1000
0 solar indirect coils		BSP-1000 B	BSP-W-1000 B

BSP LOW TEMPERATURE MIXING CIRCUIT ASSEMBLY

For direct mounting on the BSP / BSP-SL / BSP-B stratification buffer cylinders

Consisting of:

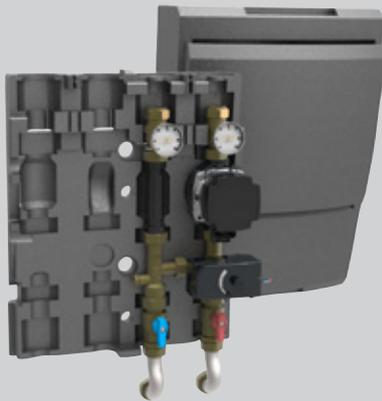

DN15-70 high efficiency pump [EEI < 0.20], self-regulating, fitted mixer motor [230 V/110 s], progressive 3-way mixer DN20 kvs=8.0, 2 ball valves in the flow and 2 in the return for servicing without draining the buffer or heating system, integrated gravity brake to prevent incorrect circulation, thermometer, well designed EPP thermal insulation shells.

Connections at top with flat gaskets G1 AG and 22 mm diameter locking ring bottom with flat gaskets G1 AG with stainless steel corrugated hoses
kvs=4.5

$\Delta p=150$ mbar at $V=1700$ l/h

at Δt 10 K up to 20 kW

at Δt 20 K up to 40 kW

BSP HIGH TEMPERATURE MIXING CIRCUIT ASSEMBLY

For direct mounting on the BSP / BSP-SL / BSP-B stratification buffer cylinders

Consisting of:

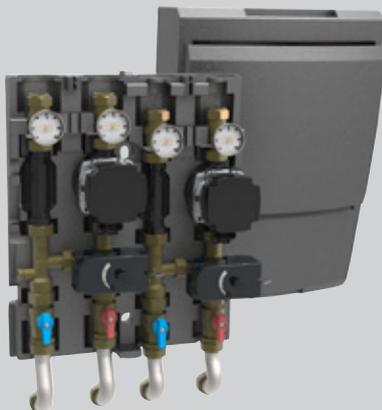

DN15-70 high efficiency pump [EEI < 0.20], self-regulating, fitted mixer motor [230 V/110 s], progressive 3-way mixer DN20 kvs=8.0, 2 ball valves in the flow and 2 in the return for servicing without draining the buffer or heating system, integrated gravity brake to prevent incorrect circulation, thermometer, well designed EPP thermal insulation shells.

Connections at top with flat gaskets G1 AG and 22 mm diameter locking ring bottom with flat gaskets G1 AG with stainless steel corrugated hoses
kvs=4.5

$\Delta p=150$ mbar at $V=1700$ l/h

at Δt 10 K up to 20 kW

at Δt 20 K up to 40 kW

BSP LOW AND HIGH TEMPERATURE MIXING CIRCUIT ASSEMBLY

For direct mounting on the BSP / BSP-SL / BSP-B stratification buffer cylinders

Consisting of:

Two DN15-70 high efficiency pumps [EEI < 0.20], self-regulating, two fitted mixer motors [230 V/110 s], two progressive 3-way mixers DN20 kvs=8.0, 2 ball valves in the flow and 2 in the return for servicing without draining the buffer or heating system, two integrated gravity brakes to prevent incorrect circulation, thermometer, well designed EPP thermal insulation shells.

Connections at top with flat gaskets G1 AG and 22 mm diameter locking ring bottom with flat gaskets G1 AG with stainless steel corrugated hoses
kvs=4.5

$\Delta p=150$ mbar at $V=1700$ l/h

at Δt 10 K up to 20 kW

at Δt 20 K up to 40 kW

STRATIFICATION BUFFER CYLINDERS

ACCESSORIES

BSP / BSP-SL / BSP-B / BSP-W / BSP-W-SL / BSP-W-B

ZP-3 DHW CIRCULATION PUMP KIT TO EXTEND THE FWS-2-60 AND FWS-2-80 FRESHWATER MODULES

Consisting of:
High efficiency DHW circulation pump, with thermostat shutdown and time switch, ball valve and offset fitting (activation from draw-off point or by means of integrated time switch)

COVER FOR BSP HEATING CIRCUIT CONNECTIONS

SOLAR CONNECTION KIT FOR SOLAR PUMP ASSEMBLY 10

For direct mounting on the BSP / BSP-W stratification buffer cylinder

Consisting of:
Thermally insulated connection lines and fixing materials

DIFFERENTIAL PRESSURE OVERFLOW VALVE, RIGHT ANGLE VERSION 1"

To DHW cascade with 2 BSP stratification buffer cylinders

Incl. threaded connection and flat gasket

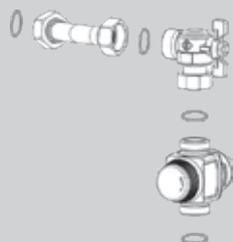

Setting range: 50-500 mbar (values directly visible)

MOTORISED VALVE

For return temperature raising for central heating backup

DN25 1", 230 V

RETURN STRATIFICATION SET BSP | FWS-2

Consisting of: Changeover valve, right-angle valve and pipework for installation in the FWS-2

The accessory set enables the temperature-dependent stratification of the return flow of the fresh water station FWS-2 into the stratification buffer cylinder BSP.

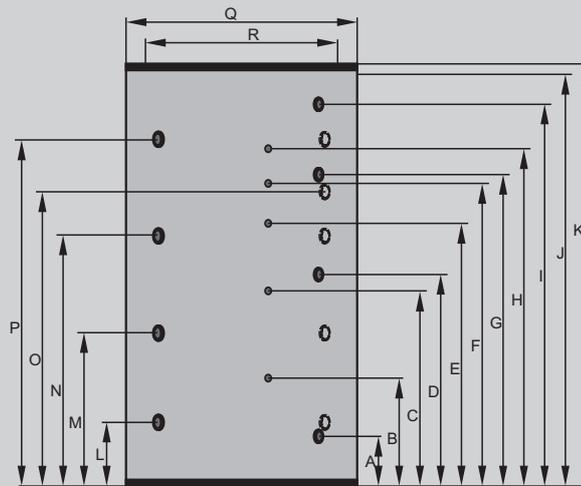

The set is recommended in particular for systems with circulation mode.

It further improves the stratification in the cylinder. The return is run into the middle or lower part of the cylinder depending on the set temperature.

The set is also easy to integrate into the fresh water station FWS-2.

The pipework between the fresh water station FWS-2 and the stratification buffer cylinder BSP is installed on-site.

FRESHWATER MODULE
WITH HIGH EFFICIENCY PUMPS (EEI ≤ 0.20)
FWS-2-60
FWS-2-80 (CASCADE)

Can be mounted on the wall or cylinder [SPU-2] without the need for expensive accessories

High DHW convenience due to readjustment [FWS-2-80: electronic, FWS-2-60: thermostatic]

Electronically controlled, only the temperature needs to be selected

Infinitely variable output adjustment thanks to a variable speed pump

Highly efficient DHW circulation pump can be integrated as an accessory

12 BENEFITS OF THE WOLF FRESHWATER MODULES
 FWS-2-60 FWS-2-80 FWS-2-80x2/x3/x4

Fully pre-assembled with well-designed thermal insulation

Scale prevention through admixture in the primary circuit

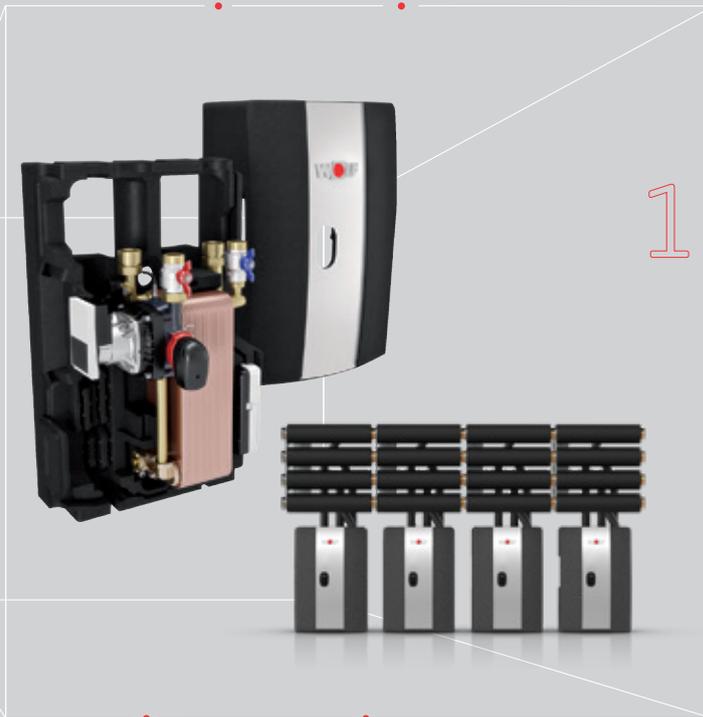

Preconfigured cascade sets of up to 4 units [FWS-2-80]

FWS-2-80 incl. taps on the DHW side of the heat exchanger

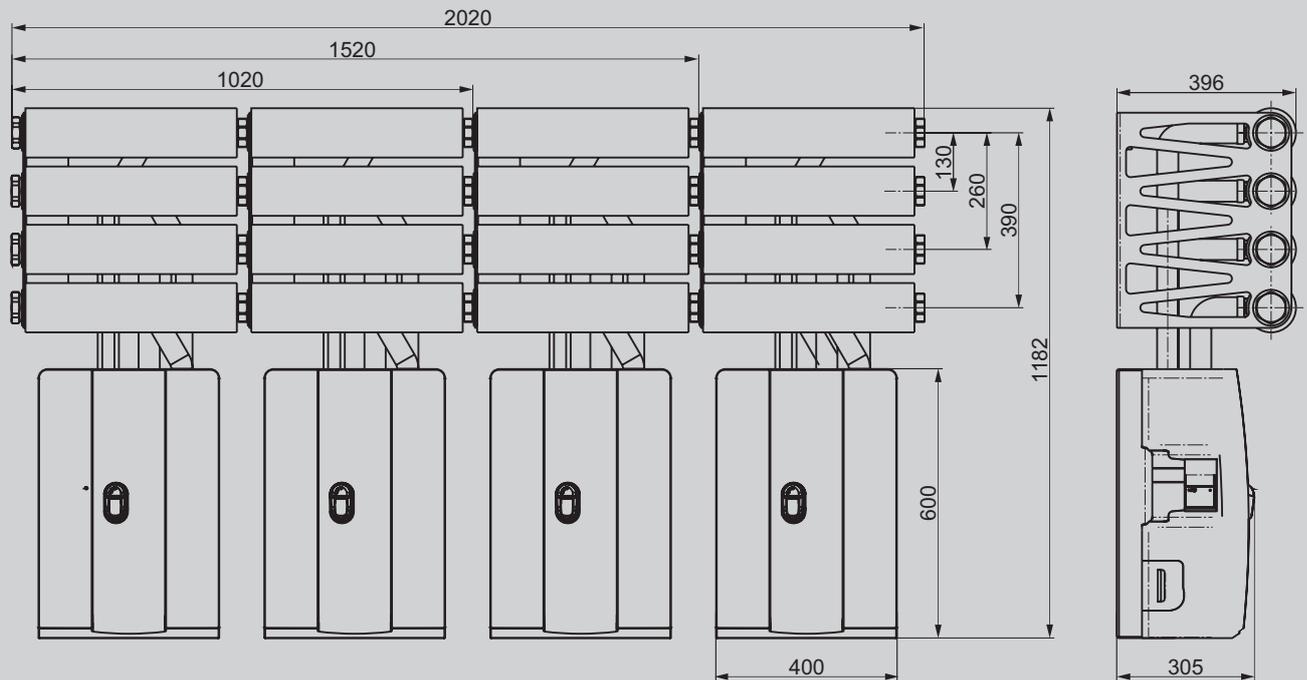

FWS-2-80 incl. pasteurisation function

Cascade sets comprising freshwater modules, cascade controller, cascade valves, DN50 piping and hygiene set

Well insulated cascade piping

**for pump setting max. = 100%

SOLAR DHW CYLINDERS
SEM-1-500/750/1000
SEM-2-300/400
SEM-1W-360

Low heat losses due to high grade rigid PUR foam or polyester fleece thermal insulation below the foil jacket of the cylinder

Solar DHW cylinder made from steel with quality certificate, two-layer enamel coating and two smooth tube indirect coils

Large indirect coil surface areas ensure a short heat-up time and a high continuous DHW output

Solar pump assembly can be fitted directly to the SEM-2 solar DHW cylinder

Connection for an electric booster heater

10 BENEFITS OF THE WOLF SOLAR DHW CYLINDER SEM-1 / SEM-2 SEM-1W

Side flange for additional indirect coil and easy maintenance

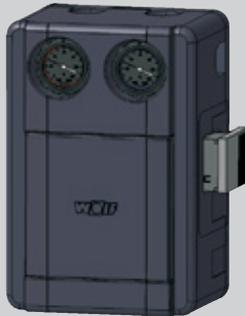

5 year statutory warranty on the floorstanding cylinder; 2 years on electrical and moving parts

SEM-1W optimised for heat pumps

Optimised diameter/height ratio for good temperature stratification

Cylinder interior and indirect coils protected against corrosion by a two-layer enamel coating and sacrificial magnesium anode

SOLAR PUMP ASSEMBLY 10

Consisting of:

High efficiency pump (EEI < 0.20), variably adjustable and fully wired with cable, ball valves with thermometer in flow and return, gravity brakes in flow and return, 6 bar safety valve, 0-10 bar pressure gauge, drain and fill valve, air separator and manual air vent valve, wall retainer and installation material

Dimensions HxWxD: 375 x 400 [250] x 190 mm, well designed EPP thermal insulation shells, resistant up to 130 °C

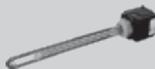

Solar pump assembly 10

Suitable for up to 10 solar collectors with 50 l Throughput per hour and collector [subject to system sizing].

Flow regulation 2 to 15 l/min.

Connection: 18 mm locking ring fitting

Note: SM1-2 and SM2-2 solar modules can be integrated into pump assembly

SOLAR CONNECTION KIT

For solar pump assembly 10 for direct installation on the SEM-2 DHW solar cylinder

ELECTRIC BOOSTER HEATER 2 KW/230 V/50 HZ / 4.5 & 6 KW/400 V/50 HZ.

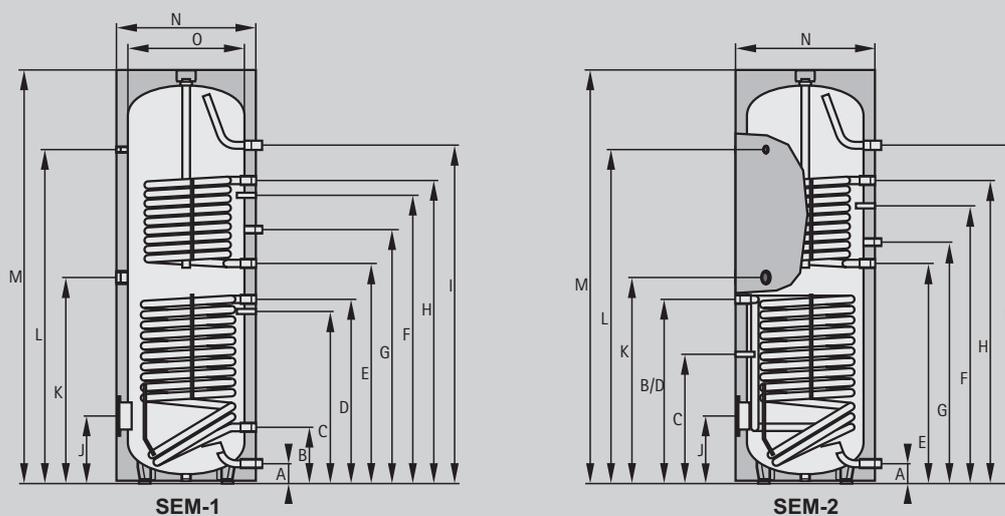

Integrated cylinder thermostat and high limit safety cut-out. Frost protection is assured. The cylinder water temperature can be adjusted either up to 60 °C or up to 80 °C.

HIGH EFFICIENCY CHARGING PUMP (EEI < 0.23)

IMPRESSED CURRENT ANODE

For enamelled cylinder

DHW CYLINDERS SE-2

Low heat losses due to high grade rigid PUR foam thermal insulation below the foil jacket of the cylinder

DHW cylinder made from steel with quality certificate, two-layer enamel coating and one smooth tube indirect coil

Inspection and cleaning apertures for easy maintenance

Optimised diameter/height ratio for good temperature stratification

Connection for an electric booster heater

**BENEFITS OF THE WOLF
DHW CYLINDER
SE-2**

5 year statutory warranty on the floorstanding cylinder; 2 years on electrical and moving parts

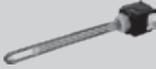

Cylinder interior and indirect coils protected against corrosion by a two-layer enamel coating and a sacrificial magnesium anode (SE-2-750 with impressed current anode)

Large, low-lying internal indirect coil for short heat-up times and a high continuous DHW output

SP-1 FROST THERMOSTAT

Incl. sensor well (to be mounted in the return)

ELECTRIC BOOSTER HEATER 2 KW/230 V/50 HZ / 4.5 & 6 KW/400 V/50 HZ.

Integrated cylinder thermostat and high limit safety cut-out. Frost protection is assured. The cylinder water temperature can be adjusted either up to 60 °C or up to 80 °C.

HIGH EFFICIENCY PRIMARY PUMP (EEI < 0.23)

IMPRESSED CURRENT ANODE

For enamelled cylinder

CYLINDER TEMPERATURE SENSOR

With round blue plug

TEMPERATURE SENSOR (NTC 5K, Ø 6 MM) LOOSE

can be used as a cylinder, central unit and supply air temperature sensor for WOLF WRS system

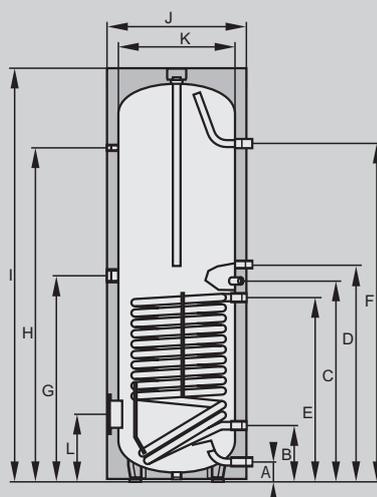

LIFTING SLINGS

Consisting of 2 tension belts each with two support loops

DHW CYLINDERS
